METAL TRANSFLUXORS. [1962] 8p. (figs. omitted)
5 refs.
Order from SLA \$1.10

63-10682

Trans. of German language article from unidentified source, n.d.

DESCRIPTORS: Metals, *Saturable reactors,
*Coupling circuits, Hysteresis, Magnetic properties,
*Magnetic alloys, Design, Ferrites.

On hand of the practical example of the three-hole-transfluxor, a number of viewpoints to be considered when choosing the shape and material for metal transfluxors are outlined. The first measuring results in connection with transfluxors out of 5000 Z and consisting of alternately stratified U-shaped parts and piled or stapled frame structures are reported and dealt with. (Author)
